Key Features

- Develop multiple funding programs
- Allocate based on performance measures
- Track items for their life cycle
- Create grant reports
- Address agency resource needs

Manage the Funding Process

The Procurement module provides administrators the flexibility to create multiple programs for different types of funding sources, including HPP and EMS distribution. Administrators are able to configure simple to complex workflows and approval processes that fit their needs. Fund allocations can be built based on definable calculations and formulas.

Track Procured Items

Items allocated through grant funding can be tracked through their entire life cycle. The procurement and inventory modules work together to display where items are located, if they were used or disposed of and their remaining usable life.

Advanced Reporting

The reporting capabilities in the procurement module give agencies the tools to make federal and state grant reporting requirements easy. Through advanced reporting techniques and agency-specific QA/QI criteria, discover how funding or grants were used and create performance measures to track participation and its relation to fund allocation.

Maintain Security

Address security and privacy concerns by defining permission groups. As funding becomes available, only eligible agencies will be able to make a request, thereby saving time by reducing the number of ineligible requests.

Inventory Key Features

- Assign inventory to any location
- Attach photos to products
- Identify products with unique bar codes
- Record product attributes
- Locate data with advanced search functionality
- Easily manage products or items with bulk actions
About ImageTrend

ImageTrend is an award-winning software development company providing streamlined solutions to a variety of industries, including: government, medical, human resources, business, education and non-profit. We strive to create a better world through technical innovation, a vision of what is possible and our commitment to designing the best web applications and strategies. The company advances this paradigm through our unique philosophy that combines a detailed understanding of our clients’ business practices and legendary customer support. Through continuing education, ideation and plans for maximizing growth, we are exploring all available opportunities and, in turn, passing this knowledge and technology to you.
